The using of chainmail gloves is limited to the protection against cuttings and stabbings due to hand knife or similar tool, of the hand which is not bearing the sharp tool. Gloves must not be worn for work involving cogged machines or tools to avoid any risk of snapping up.

Cleaning can be achieved by means of vigorous brushing water at 50°C. Rinsing requires water at 82°C.

Disinfection must be achieved using a non-acid product authorised by the appropriate health authorities.

Bien plus que la sécurité®
More than just safety
