Make Your Working Day Comfortable

Safety Specification

Genuine upper leather.

The soles are resistant to most common acids and alkalis.

The safety range is chemically inert to most common oils.

Heat resistant soles up to 300°C.

The Steel Toe Cap (STC) meets the standard of EN 12568. Built to withstand impact of 200 joules.

Extra light Vulcanized Nitrile Rubber (VNR) sole with Special Design Pattern for Extra Grip (Anti-slip).

Additional reinforced side stitching for excellent bonding.

All prots are manufactured under stringent in-house quality control plans.

Antistatic sole can be produced on request only.

The Steel sole insert meets the pierce resistance requirements of EN 12568 can be produced on request only.

Nano Silver, which have characteristics such as Antibacteria, Antifungus and Deodorise

Our Briefcase

Established in 1995, **TOPSAFE®** is today one of Malaysia's leading manufacturers and distributors of well-designed and quality safety footwear. Its products are made to international stringent quality controls and standards that include the Malaysia MS1599 : 1998 (MS EN345 : 1998) and ISO 9001 : 2000 Certification. **TOPSAFE®** also awarded the "Asia Pacific Super Excellent Brand 2006/2007" and "2006 Top 20 Excellence Brand." Its RM2 million product liability insurance policy underwritten by a reputable insurer demonstrates **TOPSAFE®**'s commitment to product excellence and to manufacture quality safety footwear for both men and women to make their working day comfortable. **TOPSAFE®** safety footwear are made to such safety specifications as having genuine upper leather, extra grip, soles resistant to common acids and alkalis, are chemically inert to common oils and having reinforced stitching for excellent bonding. Other requirements can be met on request.

TOPSAFE®

Safety without Compromise!

TOPSAFE's vision is continuously providing customer the ultimate safety and comfort without any compromise.

The fungal and bacteria in the shoes can cause a lot of problems such as athlete's foot, Warts, dry skin, redness, blisters, itching and peeling if not treated can be infectious.

Using Nanotechnology and months of research, TOPSAFE has successfully developed the TOPSAFE NanoSilver (TOPSAFE NanoSilver) – The AntiBacteria Safety Shoes, which have characteristics such as Antibacteria, Antifungus and Deodorise. This in turn has given better value in terms of health and safety.

The TOPSAFE NanoSilver shoe has been tested by SIRIM and proven to have killed more than 99% of the bacteria found in the shoes.

Nano Measurement

One-billion of a meter. For comparison purposes, consider that the width of human hair is approximately 80,000 nanometers. A nanometer-sized particle also is smaller than a living cell and can be seen only with the most powerful microscopes available today.

NanoTechnology & NanoSilver

Nanotechnology is a rapidly growing science of producing and utilizing nano-sized particles that measure in nanometers (1nm = 1 billionth of a meter). One nanomaterial that is having an early impact in healthcare product is nano-silver.

Silver has been used for the treatment of medical ailments for over 100 years due to its natural antibacteria and antifungal properties. The nano-silver particles typically measure 25nm. They have extremely large relatively surface area, increasing their contact with bacteria or fungi, and vastly improving its bactericidal and fungicidal effectiveness.

The nano-silver when in contact with bacteria and fungus will adversely affect cellular metabolism and inhibit cell growth. The nano silver suppresses respiration, basal metabolism of electron transfer system, and transport of substrate in the microbial cell membrane. The nano-silver inhibits multiplication and growth of those bacteria and fungi which cause infection, odor, itchiness and sores.

Soft

PHILOSOPHY

Quality is our utmost priority. Every unit of our product has to go through stringent quality control complying with MS1599:1998 (EN345:1998) & ISO9001:2000, and most importantly with the safety of its user prioritized.

Smooth

VISION

We envisioned ourselves to be the best designer, producer and distributor of safety footwear in the Asean region by 2016 in terms of product quality, safety, reliability and comfort with zero defect to be the target.

Comfortable

MOTTO

- I. Quality control to ensure zero defect before packaging
- II. Innovate for enhanced safety and comfort.
- III. Teamwork for continuous improvement in 3Q :-
 1. Quality in Production
 2. Quality in Delivery
 3. Quality in Safety & Comfort

Make Your Working Day Comfortable
